

## Artist CV

### Mayumi Horiuchi

I started my career with entering “TPS actor training school” of the Hokkaido Theater Foundation. After graduating, I belonged to "Theater Laboratory Ban-Yu-Inryoku" of the theater company in Tokyo, and then I returned to Sapporo to start the stage activities as the actor, dancer, choreographer and artist, making dance works, video works and other works related to “body”.

Through my working, I became interested in "physicality" deeply, and started to study "Michael Chekhov Technique" of the acting method to focus mainly on "body sensation" and the “Community Dance”, and started to have some workshops with various kinds of people and make the works related on them. The award I received recently was “the JR Tower ART BOX 2017 Excellence Award” as the video installation work.
